Johan, 41

- Material sourcing leader at IKEA
- New problems arise around his suppliers every day
- Unclear data
- Needs change under an evolving ecosystem
- Sustainable materials

TEXTILE MAP

Textile Map is a dashboard designed to help sourcing managers gain insight and visualize supply chains for different IKEA textiles.

The many benefits of Textile Map

- One dashboard for textile supply chains
- Full chain visibility
- Clear decision support
- Simple and trustworthy

Social dimension

Immediate

− Risk of misinterpreting data.

+ Easier collaboration between sourcing teams.

Enabling

− Inaccurate data may cause misunderstandings.

+ Better supplier cooperation.

Structural

− Smaller suppliers may struggle with requirements.

+ Greater supply chain transparency and trust.

Individual dimension

Immediate

− Employees need to learn a new system.

+ Quick access to supplier data saves time.

Enabling

− Overreliance on data may reduce independent judgment.

+ Better-informed sourcing decisions.

Structural

− Reliance on digital tools may reduce autonomy.

+ Stronger decision-making skills and confidence.

Technical Dimension

Immediate

+ Dashboard presenting relevant data

– New users needs to adapt

Enabling

+ Decision processes are quicker

– Integration between IKEA's previous systems and Textile Map

Structural

+ Comparing and analyzing data is now a backbone of every decision regarding supply chains in IKEA.

Environmental Dimension

Immediate

+ Easier access to environmental data

Enabling

+ Sourcing managers can make more sustainable choices leading to a reduced carbon footprint
- Suppliers may provide misleading or inconsistent environmental data

Structural

+ Contributes to reduce IKEA's GHG emissions

Economic Dimension

Immediate

- Costs for further development

Enabling

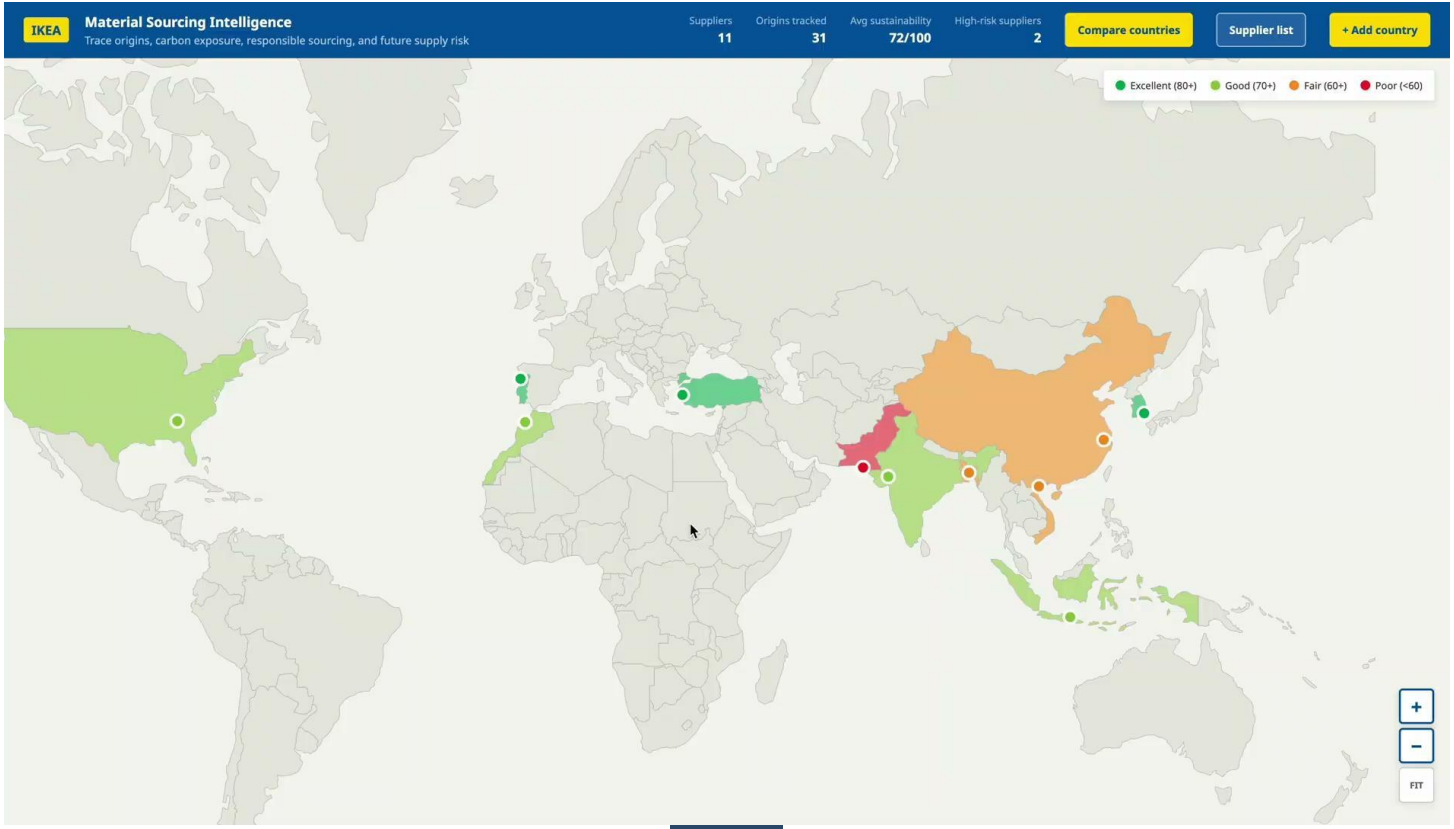

- Training employees to use the platform requires time and money
+ Saves time and resources through more efficient sourcing

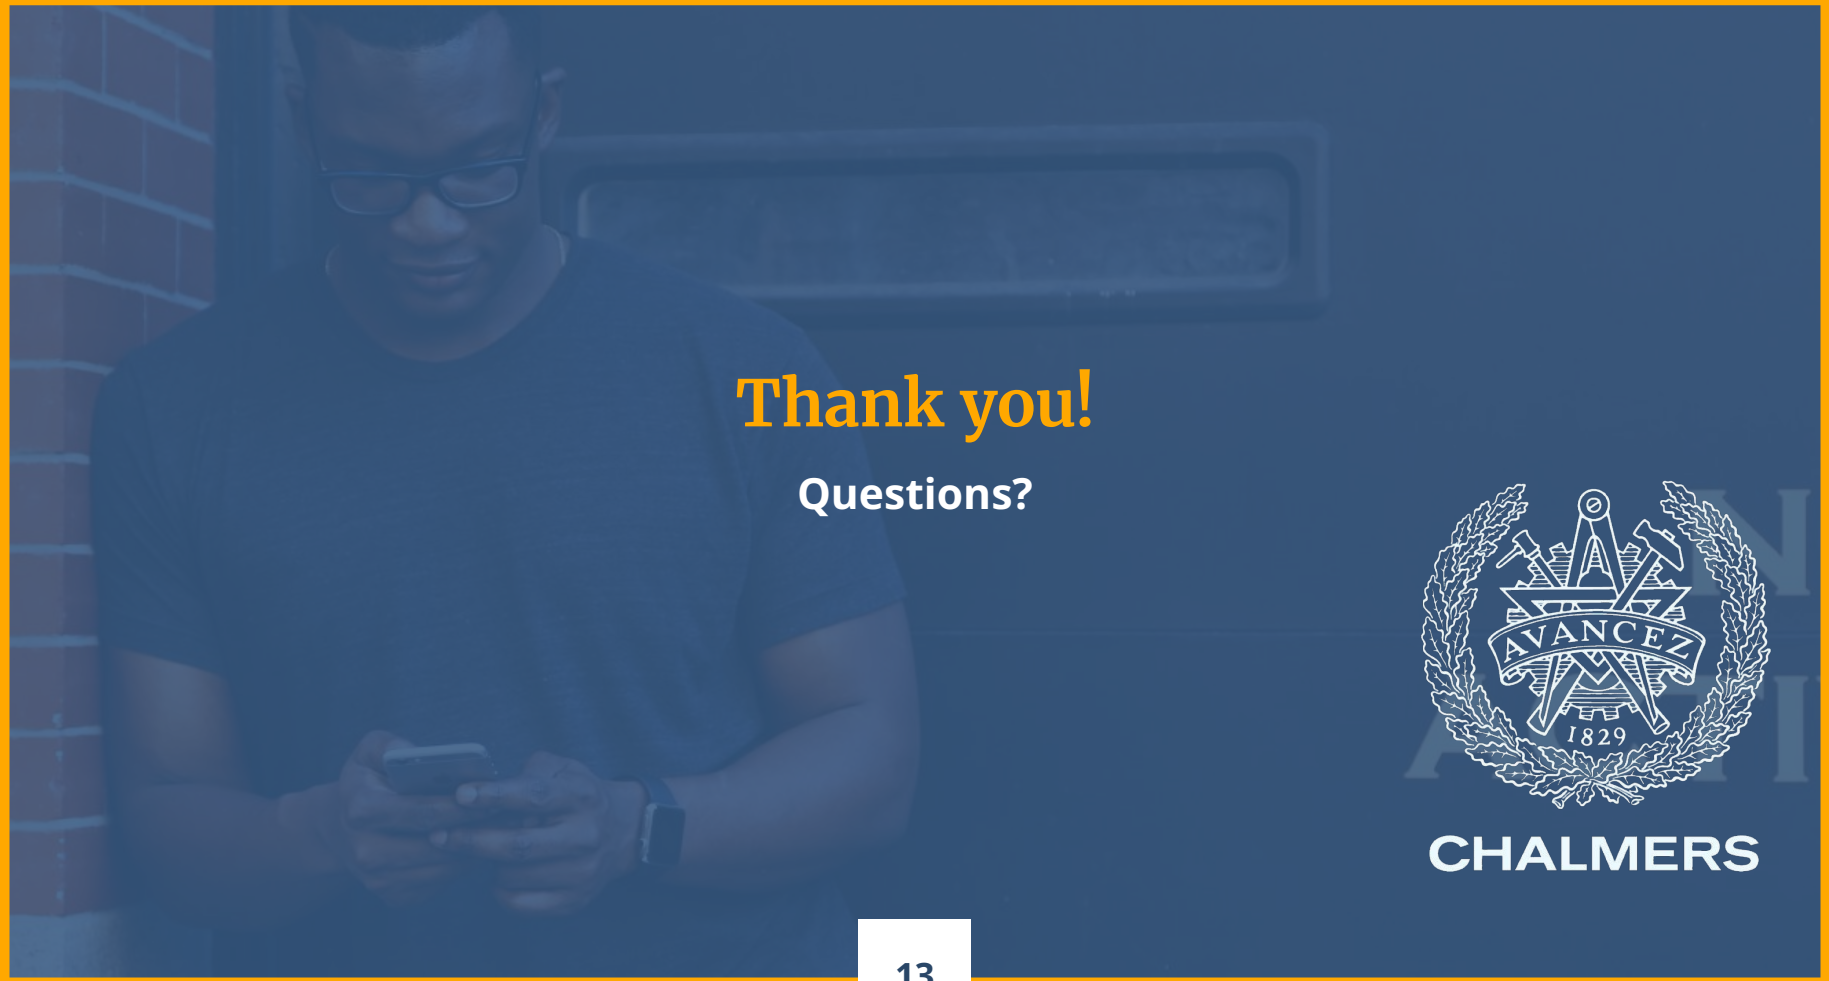

Structural

+ Smaller suppliers may face higher costs to meet sustainability requirements.
+ Cost-effective sourcing
